Summer 2021

Carly Naundorff
Eckerd College to Saint Mary's University

"I have an interest in wildlife biology and ecology, and this internship will help me get to explore a little bit more of that realm. I'm finding my path in this field, and so far I have liked everything I have done. I'm so glad I got to go. That was my first time out of the country, and it was an amazing experience."

Andrea Green
Georgia Institute of Technology to University of Victoria

"Being in this program has allowed me to see the slight cultural differences between all of us and appreciate those differences. One of the main reasons I chose to take part in the program was to talk with people from other countries and I would be very willing and happy to one day be part of a global effort to detect arsenic in water."

Summer 2021

Summer 2022

Maggie Sardino
Syracuse University to University of Victoria

"I was inspired to apply for the Fulbright Canada Mitacs Globalink Program for two major reasons. First, it presented me with an opportunity to engage in cutting-edge community-based research. Canada is one of the leading countries in this field of research and learning. I could not pass up on an opportunity to be trained and mentored by the leaders within community-based research. Secondly, the program emphasizes the importance of building relationships across the U.S. and Canada. As someone who has not had much opportunity to travel, being able to experience living in another country and being supported by the Fulbright network presented me with the resources to immerse myself in another country and expand my perspective."
